

MOM - 8th April 2025, Tuesday

Attendees - Stuti Nainwal, Jay Sudhir Chavan

Agenda: Finalization of tech stack, API selection, and initial database design discussion for the project.

1. **APIs Selection:** Shortlisted Eventbrite, Ticketmaster, LinkedIn, and Google Maps APIs for integration.
2. **Tech Stack:** Decided on frontend (HTML, CSS, AJAX, Express.js), backend (Node.js with Express.js), and SQLite3/MySQL2 for the database depending on local or production needs.
3. **Database Design:** We discussed the database design and came to a consensus on the structure to be used for storing events, users, and other related data.
4. **Next Steps:** Clarify database setup (local vs. production) and API integrations.
